Sustainability Research

CONVERGENCE | MAY 2020

Adaptation and Evolution

The best companies adapt. They build on a durable existing business by investing in options that pave a path for continued profitable growth. This is true not only for companies but for investment firms as well. Because markets evolve, we know that we have to be adaptive in how and where we seek opportunities. It is always “different this time”—it’s just a matter of degree.

At Berkshire Hathaway’s annual meeting in 2017, Warren Buffett noted a sea change in the investment landscape: today’s largest and highest-quality businesses flourish with little tangible capital. The following day, he again mentioned the idea and added that “I don’t think people appreciated it—at all.” Investors who fail to recognize the circumstances that create opportunity will find it harder to adopt strategies that succeed than investors whose beliefs match reality.

Accumulated intellectual property, including brands and patents, now creates more value for shareholders than manufacturing plants and storefronts. Communication channels that used to be closed to all but the richest advertisers are now open, supported by large follower counts, and reflective of a collective social consciousness. Today’s leading companies employ talented knowledge workers who create products with purpose. It is this sense of purpose that creates demand. Success requires cultural alignment between employees and customers. Done right, this alignment adds value to both constituencies and distinguishes a company from its competitors.

Integration With Our Culture and Framework

We at Counterpoint Global make long-term investments in companies that we believe can realize a significant increase in market value over time as a result of enduring competitive advantages stewarded by capable management teams. Our culture combines a partnership mindset with a commitment to continuous learning, intellectual flexibility and self-awareness. We are willing to be different when necessary in order to strengthen our advantage. We seek these traits in company management. In our view, the most lasting value is created by executives who make thoughtful decisions that incorporate the needs of all stakeholders. Whether in capital allocation, corporate governance, operational excellence or regulatory compliance, our focus on sound practices is resolute.

Our study of unique businesses reveals that the ways management teams create value is changing. A railroad is much different than social media, and physical barriers to entry are much different than network effects. With the shift from tangible to intangible investments comes an expansion in the stakeholder base and change in the creation of competitive advantage. Smart management teams recognize these shifts, and appreciate what is required of them as they pursue profitable growth. Similarly, we have worked hard to understand these factors. As a result, a formalized Sustainability Research framework is now integrated into our investing process.

Existing Limitations Provide Opportunity

Sustainability Research is not a separate methodology or exclusive from our core activities at Counterpoint Global. Our approach is additive to our existing investment process and to our anticipated investment returns. Human behavior is anchored on existing processes and relationships and is among the hardest things to change. We think the same holds true for investors. The implementation of an ESG methodology is failing at many investment firms because of a combination of inertia and a lack of understanding. This failure includes:

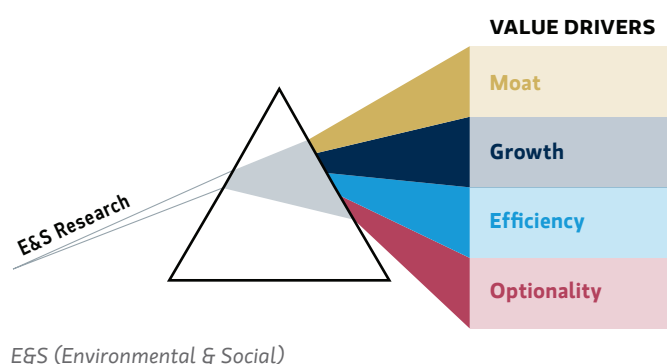

1. The inability to recognize a material regime shift in the investment landscape towards sustainability, providing a large opportunity with less competition;
2. Applying a revolutionary approach instead of an evolutionary one and disturbing what is “already working” in an investment process;
3. A reliance on underdeveloped, third-party metrics for implementation, pointing investors in the wrong direction; and
4. Assuming that sustainable investing results only in excluding companies from an investment universe rather than identifying companies with stocks that are expected to generate attractive returns.

The biases that these limitations create in the market are what we seek to exploit. However well intentioned, a sustainability index fund may include a natural resources company engaged in strip mining and exclude a company that has an unusual share class structure even if it has a management team with proper alignment and incentives. We prefer to exercise our own judgment rather than abide by the restrictions that others impose.

Socially Responsible Investing: Historically a reductive process

Counterpoint Global: Sustainability Research as an additive lens

Leadership

Our Sustainability Research emerged from the creativity, passion and entrepreneurial spirit of one of our team members just as our Disruptive Change Research did fifteen years ago. Thomas Kamei leads our effort in New York by promoting awareness of sustainability trends across our organization. A student of architecture and design, Thomas pairs his understanding and vision of structural systems with a decade of experience investing in leading internet companies. His leadership has enabled us to collaborate with nonprofit and public sector stakeholders as well as to engage with the management teams of our current and prospective company investments.

Sustainability Research in Practice

Our Sustainability Research has identified risks that other investors have underappreciated and investment opportunities they have overlooked.

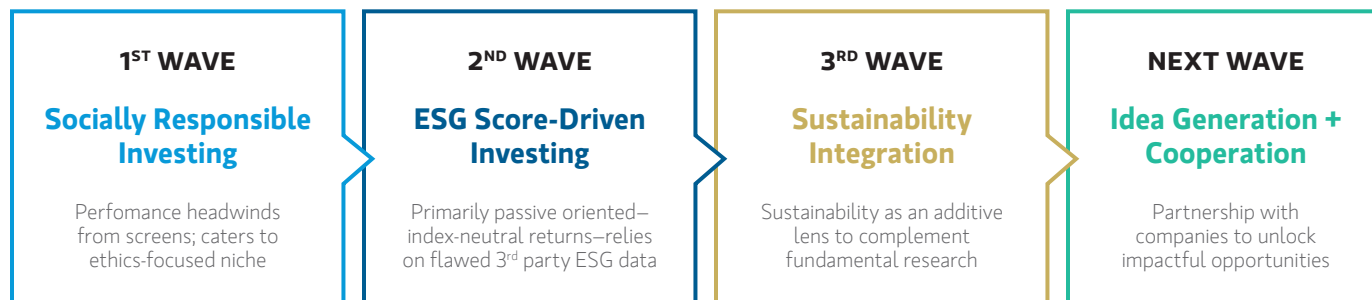

For example, let's start with **environmental issues**:

- RISK** Companies that produce goods that are difficult to recycle are struggling from increasing consumer and regulatory scrutiny.
- OPPORTUNITY** Companies that provide water and energy conservation services to customers, such as cloud computing datacenters, are flourishing as they help reduce operating costs for their customers.

The same point applies to **social issues**:

- RISK** Concerns about data privacy are emerging as expensive threats for many established financial services businesses.
- OPPORTUNITY** Decentralized financial innovations such as blockchain provide the potential for increased financial inclusion for low-income citizens in emerging markets.

Our Sustainability Research has helped us with governance as well. Our proprietary method for measuring and evaluating sustainability has led to valuable and expanding conversations with management teams. Most managements appreciate us sharing the insights we have gleaned from studying how companies have successfully aligned profits and impact. The result is a valuable two-way dialogue. A deepening of our partnership with the management teams in our investment portfolio naturally leads to a better understanding of their decision-making process. This gives us a deeper appreciation for the risks and opportunities they face. By engaging management teams on sustainability, we signal that we value these efforts for both their long-term value creation potential and positive impact on society.

Different, But Same

We are investors first and foremost. Our paramount responsibility is to protect and grow the wealth of our clients. Because the stock market is a complex adaptive system, an investment team must evolve in order to understand opportunities and translate them into excess returns. Our Sustainable Research is allowing us to gather data that is more useful than traditional ESG screens. This enables us to capture insights from company management and to observe trends that were previously hidden.

Sustainability initiatives are often criticized outside of investing because the costs and outcomes are unknown. While the impact of sustainability on investing is difficult to measure precisely, we believe the convergence of profits and purpose will lead to improved long-term business performance and investment returns.

"Investor" refers to an analyst or portfolio manager of Counterpoint Global.

Team members may change without notice from time to time. Years of Experience listed above refers to Industry Experience.

Years of Experience, Years with Firm and Years with Team are as of June 2023.

Risk Considerations

There is no assurance that a Portfolio will achieve its investment objective. Portfolios are subject to **market risk**, which is the possibility that the market values of securities owned by the Portfolio will decline and that the value of Portfolio shares may therefore be less than what you paid for them. Market values can change daily due to economic and other events (e.g. natural disasters, health crises, terrorism, conflicts and social unrest) that affect markets, countries, companies or governments. It is difficult to predict the timing, duration, and potential adverse effects (e.g. portfolio liquidity) of events. Accordingly, you can lose money investing in this Portfolio. Please be aware that this Portfolio may be subject to certain additional risks. In general, **equities securities'** values also fluctuate in response to activities specific to a company. Investments in **foreign markets** entail special risks such as currency, political, economic, market and liquidity risks. The risks of investing in **emerging market countries** are greater than risks associated with investments in foreign developed countries. **Privately placed and restricted securities** may be subject to resale restrictions as well as a lack of publicly available information, which will increase their illiquidity and could adversely affect the ability to value and sell them (liquidity risk). **Derivative instruments** may disproportionately increase losses and have a significant impact on performance. They also may be subject to counterparty, liquidity, valuation, correlation and market risks. **Illiquid securities** may be more difficult to sell and value than public traded securities (liquidity risk). **ESG Strategies** that incorporate impact investing and/or Environmental, Social and Governance (ESG) factors could result in relative investment performance deviating from other strategies or broad market benchmarks, depending on whether such sectors or investments are in or out of favor in the market. As a result, there is no assurance ESG strategies could result in more favorable investment performance. **Active Management Risk.** In pursuing the Portfolio's investment objective, the Adviser has considerable leeway in deciding which investments to buy, hold or sell on a day-to-day basis, and which trading strategies to use. The success or failure of such decisions will affect performance. To the extent the Portfolio invests a substantial portion of its assets in the information technology sector, the Portfolio may be particularly impacted by events that adversely affect the sector, such as rapid changes in technology product cycles, product obsolescence, government regulation, and competition, and may fluctuate more than that of a portfolio that does not invest significantly in companies in the technology sector.

DEFINITIONS

"ESG" investment: Environmental Social and Governance based investment is an investment approach which takes explicit account of the environmental, social and corporate governance aspects of all proposed investments.

IMPORTANT INFORMATION

There is no guarantee that any investment strategy will work under all market conditions, and each investor should evaluate their ability to invest for the long-term, especially during periods of downturn in the market.

A separately managed account may not be appropriate for all investors. Separate accounts managed according to the Strategy include a number of securities and will not necessarily track the performance of any index. Please consider the investment objectives, risks and fees of the Strategy carefully before investing. A minimum asset level is required.

For important information about the investment managers, please refer to Form ADV Part 2.

The views and opinions and/or analysis expressed are those of the author as of the original publication date and are subject to change at any time due to market or economic conditions and may not necessarily come to pass. Furthermore, the views will not be updated or otherwise revised to reflect information that subsequently becomes available or circumstances existing, or changes occurring, after the date of publication. The views expressed do not reflect the opinions of all investment personnel at Morgan Stanley Investment Management (MSIM) and its subsidiaries and affiliates (collectively "the Firm"), and may not be reflected in all the strategies and products that the Firm offers.

Forecasts and/or estimates provided herein are subject to change and may not actually come to pass. Information regarding expected market returns and market outlooks is based on the research, analysis and opinions of the authors or the investment team. These conclusions are speculative in nature, may not come to pass and are not intended to predict the future performance of any specific strategy or product the Firm offers. Future results may differ significantly depending on factors such as changes in securities or financial markets or general economic conditions.

ASIA PACIFIC

Hong Kong: This material is disseminated by Morgan Stanley Asia Limited for use in Hong Kong and shall only be made available to "professional investors"

as defined under the Securities and Futures Ordinance of Hong Kong (Cap 571). The contents of this material have not been reviewed nor approved by any regulatory authority including the Securities and Futures Commission in Hong Kong. Accordingly, save where an exemption is available under the relevant law, this material shall not be issued, circulated, distributed, directed at, or made available to, the public in Hong Kong. **Singapore:** This material is disseminated by Morgan Stanley Investment Management Company and may not be circulated or distributed, whether directly or indirectly, to persons in Singapore other than to (i) an accredited investor (ii) an expert investor or (iii) an institutional investor as defined in Section 4A of the Securities and Futures Act, Chapter 289 of Singapore ("SFA"); or (iv) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA. This publication has not been reviewed by the Monetary Authority of Singapore. **Australia:** This material is provided by Morgan Stanley Investment Management (Australia) Pty Ltd ABN 22122040037, AFSL No. 314182 and its affiliates and does not constitute an offer of interests. Morgan Stanley Investment Management (Australia) Pty Limited arranges for MSIM affiliates to provide financial services to Australian wholesale clients. Interests will only be offered in circumstances under which no disclosure is required under the Corporations Act 2001 (Cth) (the "Corporations Act"). Any offer of interests will not purport to be an offer of interests in circumstances under which disclosure is required under the Corporations Act and will only be made to persons who qualify as a "wholesale client" (as defined in the Corporations Act). This material will not be lodged with the Australian Securities and Investments Commission.

Japan

For professional investors, this material is circulated or distributed for informational purposes only. For those who are not professional investors, this material is provided in relation to Morgan Stanley Investment Management (Japan) Co., Ltd. ("MSIMJ")'s business with respect to discretionary investment management agreements ("IMA") and investment advisory agreements ("IAA"). This is not for the purpose of a recommendation or solicitation of transactions or offers any particular financial instruments. Under an IMA, with respect to management of assets of a client, the client prescribes basic management policies in advance and commissions MSIMJ to make all investment decisions based on an analysis of the value, etc. of the securities, and MSIMJ accepts such commission. The client shall delegate to MSIMJ the authorities necessary for making investment. MSIMJ exercises the delegated authorities based on investment decisions of MSIMJ, and the client shall not make individual instructions. All investment profits and losses belong to the clients; principal is not guaranteed. Please consider the investment objectives and nature of risks before investing. As an investment advisory fee for an IAA or an IMA, the amount of assets subject to the contract multiplied by a certain rate (the upper limit is 2.20% per annum (including tax)) shall be incurred in proportion to the contract period. For some strategies, a contingency fee may be incurred in addition to the fee mentioned above. Indirect charges also may be incurred, such as brokerage commissions for incorporated securities. Since these charges and expenses are different depending on a contract and other factors, MSIMJ cannot present the rates, upper limits, etc. in advance. All clients should read the Documents Provided Prior to the Conclusion of a Contract carefully before executing an agreement. This material is disseminated in Japan by MSIMJ, Registered No. 410 (Director of Kanto Local Finance Bureau (Financial Instruments Firms)), Membership: the Japan Securities Dealers Association, The Investment Trusts Association, Japan, the Japan Investment Advisers Association and the Type II Financial Instruments Firms Association.
